

Book reviews:

- *I can sincerely recommend to any lawyer wishing to get a "wider picture" of international law to read this book. Dr Petr Válek, Czech Yearbook of International Law*
- *Zidar ... concludes that collective sets of rules to curb anarchy and regulate procedures for dealing with global challenges – from the climate crisis to the fight against pandemics – are indispensable, because without the support of globally shared norms, mechanisms and procedures, these and other crises cannot be dealt with or even overcome. Professor Hans-Joachim Giessmann, S+F Sicherheit und Frieden / Security and Peace*

Recommendations:

- *This in many ways unique book is a significant contribution to the understanding of past, present and also future world order. In particular the author clarifies the complex interplay between hegemony and constitutionality, the two persistent and dynamic tendencies in international life and in search for a world order. Professor Ernest Petrič, member of the UN International Law Commission and former President of the Constitutional Court of Slovenia*
- *In this extensive and lucid analysis of the natural tension between hegemony and constitutionalism, Dr Andraž Zidar makes a compelling argument on how the apparently paradoxical phenomena coexist in international affairs and thrive on each other. This book is a must read for students, scholars and practitioners of international relations, which guides the reader in the intricacies of world politics through the prism of power and law. Professor Yossi Mekelberg, Regent's University London and Chatham House*
