

TABLE OF CONTENTS

Introduction	xix
Part I Looking Ahead	
1 Outer Space and Science Fiction	3
<i>Gary L. Bennett</i>	
1 Introduction	3
2 Origins of Science Fiction	4
3 Early Fictional Flights into Outer Space	6
4 Destination Moon	8
5 Flight to Mars	13
6 The Stars Our Destination	17
7 Law in Science Fiction	20
8 Science Fiction Inspirations	23
9 Concluding Remarks	24
2 Space Tourism: Reality Soon?	25
<i>Marietta Benkö and Gabriele Röhn</i>	
1 Space Tourism: Still a Futuristic Project?	26
2 Risks Involved	26
3 Legal Framework	27
4 Some Environmental Aspects	28
3 New Space and Newest Space	31
<i>Dmitry Payson</i>	
1 Introduction	31
2 Space Markets and Commercial Space	32
3 New Space Emerges	35
4 Space Dichotomies	35
4.1 Applied and Non-Applied	36
4.2 Commercial and Not-For-Profit	37
4.3 Public and Private	37
4.4 Budgetary and Extrabudgetary	38
4.5 Products and Projects	38

TABLE OF CONTENTS

5	New Actors Come In	39
6	New Businesses for Newest Space	42
7	Institutions Follow	44
4	Space Colonies: Is History Repeating?	51
	<i>Jean-François Mayence</i>	
1	Foreword	51
2	Introduction	51
3	The Frontier	53
3.1	The Frontier, an American Concept with European Roots	54
3.2	Appropriating New Worlds	56
4	From Space Colonies to Space States	58
4.1	The Overview Effect	58
4.2	The Colonization Process	59
4.3	The Secession Process	63
4.4	The Issue of Resources	64
5	Conclusion	67
5	Extra-Terrestrial Human Bases at the Crossroads of Economic and Space Law	69
	<i>Philippe Clerc</i>	
1	Overview of the Issues	69
1.1	Specificity of Human Bases Located on Extra-Terrestrial Soil	70
1.2	A New Debate that Shifts to the Field of Economic Law	71
1.2.1	Legitimacy of States Intervention	71
1.2.2	Legitimacy of Space Law to Deal with Economic Issues	73
1.2.3	Private Appropriation of Natural Resources	74
1.2.4	International Governance Regime	75
1.2.5	Benefit-Sharing vs. Return on Investment	76
1.3	Lines of Convergence	77
2	Title for Land Occupation	78
2.1	Land Title for Limited Use and Duration (LTLUD)	79
2.1.1	Legal Instruments for Dismantling Land Title	80
2.1.2	Terms and Conditions of Title Dismantling	81
2.1.3	Legal Effects of the Land Title for Limited Use and Duration (LTLUD)	82
2.2	Marginal Utility of Claiming Title on Resources	82
2.2.1	Untitled Operator's Alternative Rights	82

	2.2.2	Volatility of Ownership on Resources	83
3		Facility Operations: Governance and Licensing	85
	3.1	Governance Scheme	85
	3.2	Building Permits (Aedificandi Auctoritas)	87
	3.2.1	Building Permit Terms and Conditions	87
	3.2.2	Building Permit Legal Effects	88
	3.3	License for Development and Operations	88
	3.3.1	License Terms and Conditions	89
	3.3.2	License Legal Effects	89
4		Conclusion	90
6		Perspectives for Outer Space as a ‘Global Common’	93
		<i>Kai-Uwe Schrogl</i>	
1		The Concept of the ‘Global Commons’ Under Pressure	93
2		Innovative International Law	94
3		Characterising the Three ‘Global Commons’	95
4		Key Conflict Issues	97
5		For a New Approach to Managing the ‘Global Commons’: Moratoria, Thresholds, Fees, Codes of Conduct	99
Part II Conflicts and Challenges			
7		International Challenges to the Safety, Security and Sustainability of Outer Space Activities	105
		<i>Gerard Brachet and Peter Martinez</i>	
1		Introduction	105
2		Cause for Concern	106
3		Some Numbers	108
4		Threats Resulting from Increasing Traffic in Outer Space	110
5		Threats Resulting from Aggressive Behaviours in Outer Space	113
6		Initiatives within the United Nations Committee on the Peaceful Uses of Outer Space	114
7		The European Union’s Proposal for an International Code of Conduct for Outer Space Activities	116
8		Russia and China’s Proposal for a Treaty on the Prevention of the Placement of Weapons in Outer Space	118
9		The UN Group of Governmental Experts on TCBMs in Outer Space Activities	119

TABLE OF CONTENTS

10	Group of Governmental Experts on Further Practical Measures for the Prevention of an Arms Race in Outer Space	120
11	UN Resolution on “Reducing Space Threats through Norms, Rules and Principles of Responsible Behaviours”	122
12	The Artemis Accords	122
13	Towards a Regime of Space Traffic Management?	124
14	Conclusion	127
8	Electronic and Cyber Warfare in Outer Space: Challenges in Governance	129
	<i>Rajeswari Pillai Rajagopalan</i>	
1	Introduction	129
2	Changing Space Environment	130
3	Counterspace Capabilities	131
4	Electronic and Cyber Warfare Capabilities	133
4.1	Electronic Warfare Capabilities	133
4.2	Cyber Warfare Capabilities	135
5	Current Global Governance Measures	137
6	Possible Pathways for the Future	139
9	Arms Control in Outer Space: Solving the Impasse – The ‘Göttingen Treaty’ Proposal Revisited	141
	<i>Jürgen Scheffran</i>	
1	The New Space Race and the Need for Regulation	141
2	Dual-Use and the Militarization of the Space Frontier	142
3	Risk Reduction, Confidence Building and Rules in Space	145
4	International Space Law: Peaceful Purposes and Preventing an Arms Race	146
4.1	The Framework of International Space Law	146
4.2	Initiatives Against an Arms Race in Space	148
4.3	Comparative Classification of Options for Space Arms Control	149
5	The Göttingen Draft Treaty	150
5.1	Principles	151
5.2	Definitions	152
5.3	Anti-Satellite Weapons	153
5.4	Space-Based Weapons	155
5.5	Military Use of Satellites	155
6	Verification of Space Arms Control	157
6.1	Conditions, Requirements and Means of Verification	157
6.2	Verification and Risk of the Göttingen Draft Treaty	158

6.3	Summary and Evaluation	160
7	Alternative Approaches to Space Arms Control	162
7.1	Partial Arms Control in Space	162
7.2	International Control of Ballistic Missiles and Missile Defences	164
7.3	Evolving Diplomatic Initiatives on Space Security and Arms Control	165
7.3.1	EU Code of Conduct for Outer Space	165
7.3.2	Chinese-Russian Draft Treaty Against Space Weapons	165
7.3.3	Canadian Proposals on the Non-Weaponization of Space	166
7.3.4	Groups of Governmental Experts on Space Security	166
8	Common Security and Sustainable Peace in Outer Space	166
8.1	The Changing Landscape of Space Security	166
8.2	Common Security in Outer Space	167
8.3	Solving the Impasse: The Role of Citizens, Scientists and the Public	169
9	Appendix: Proposed Draft Treaty on the Limitation of the Military Use of Outer Space	170
10 Space Traffic Management – Looking at the Operational Realities of a Wicked Problem		175
	<i>Marc Becker</i>	
1	Introduction	175
2	Definitions and Main Concepts of STM	176
3	The Changing Space Environment as a Driver for STM	180
4	Operational Aspects and Practical Realities of STM	182
5	Current Approaches to SST and STM in the United States and Europe	186
6	Conclusion and Perspective	189
11 Space Debris: Technical Aspects		191
	<i>Carsten Wiedemann, Andre Horstmann, Lorenz Böttcher, Kerstin Soggeberg, Eduard Gamper, Jürgen Lorenz, Manuel Schubert and Enrico Stoll</i>	
1	Introduction	191
2	Methods	192
3	Scientific Background	193
4	The Space Debris Environment	194
4.1	Fragments	196
4.2	Solid Rocket Motor Slag	196

TABLE OF CONTENTS

4.3	Sodium-Potassium Droplets	197
4.4	Multilayer Insulation	197
4.5	Ejecta and Paint Flakes	198
4.6	The Dynamics of Space Debris	198
4.7	Centimetre Population	199
4.8	Risk of Space Debris	201
4.9	Deliberate Satellite Destructions	204
5	Satellite Constellations	206
5.1	Cosmos-Iridium Collision	206
5.2	Orbital Altitudes of Mega-Constellations	207
5.3	Stability of Mega-Constellations	209
6	Summary	211
12 Oceanic Dumping of Space Objects and the Conservation of Marine Biodiversity in Areas Beyond National Jurisdiction		213
<i>Vito De Lucia</i>		
1	Introduction	213
2	The Re-Entry of the MIR Station	214
2.1	The MIR Splashdown	214
2.2	The RIO Group Concerns	217
3	Space Debris and Splashdowns in Marine Areas Beyond National Jurisdiction	221
3.1	The ‘Spacecraft Cemetery’ and the Practice of Splashdowns in the South Pacific	221
3.2	Knowledge Gaps and Environmental Impact Assessment Under Space Law	224
4	The Obligation to Assess the Impact of Splashdowns Under International Law of the Sea	226
4.1	Introduction	226
4.2	The General Framework for the Protection and Preservation of the Marine Environment	227
4.3	Environmental Impact Assessment	230
5	Splashdowns and the Process Towards a New Treaty on Marine Biodiversity in Areas Beyond National Jurisdiction	234
5.1	The BBNJ Process in Brief	234
5.2	EIAs in the BBNJ Process	235
6	Conclusions	238

13 Commercial Space Launches and Depletion of the Ozone Layer: Emergent Issues	239
<i>Ruwantissa Abeyratne</i>	
1 Introduction	239
2 The Ozone Layer and Its Nuances	243
3 International Principles of Accountability	246
4 International Treaties	252
5 Balancing Two Considerations	256
5.1 Healthy Environment	256
5.2 The Polluter Pays Principle	258
6 Conclusion	262
14 Satellite Constellations and Orbital Pollution – Need for New Policies and Regulations	267
<i>Ram S. Jakhu, Joseph N. Pelton and Nishith Mishra</i>	
1 Introduction	267
2 The Particular Risk Presented by Large-Scale Satellite Constellation	270
3 An Evolving System of Global Space Governance and Regulations to Tackle the Challenges of this Century	273
4 New and Improved Efforts to Tackle the ‘Orbital Pollution’ Issue	276
4.1 Space Situational Awareness	277
4.2 Space Traffic Management and Satellite Constellations	278
4.3 On-Orbit Servicing and Active Debris Removal	281
4.4 Consideration of Other Forms of Orbital Pollution	283
4.4.1 Light Pollution	283
4.4.2 Radio Frequency Interference	288
4.4.3 Ozone Depletion	288
5 New Regulation, Best Practices and Legal Reforms to Address the Orbital Pollution and Other Forms of ‘Orbital Pollution’	289
5.1 Key Elements of Proposed Amendments to the Space Law Treaties and Improving Functionality of Soft Law Instruments	289
5.2 Basic Elements of a Global Fund for Orbital Debris Removal	292
5.3 Protections and Regulatory Processes Related to Cyber-Attacks, Military Uses of Space and Light Pollution	293
6 Conclusion	294
7 Appendix	296

TABLE OF CONTENTS

15 Dream of the Stars – The Benefits of Nuclear Power and Propulsion	305
<i>Gary L. Bennett</i>	
1 Introduction	305
2 Generic Nuclear Power Sources	307
3 Historical Use of Nuclear Power in Space	309
3.1 U.S. Use of Nuclear Power Sources in Space	309
3.2 Other Uses of Nuclear Power Sources in Space	314
4 Nuclear Propulsion in Space	316
4.1 Nuclear Thermal Propulsion in Space	316
4.2 Nuclear Electric Propulsion in Space	319
5 Advanced Space Propulsion Candidates	321
6 International Aspects of the Use of Nuclear Power in Space	323
7 To the Stars	325
16 Nuclear Technologies in Future Space Exploration and Questions of Environmental Law	327
<i>Ulrike M. Bohlmann and Matija Renčelj</i>	
1 Introduction	327
1.1 History of Use	328
1.2 History of International Regulation	329
2 International Regulatory Outlook and National Developments	335
2.1 Nuclear Power Sources in International Fora	335
2.2 National Regulations	337
2.2.1 Regulation in the United States	338
2.2.2 Regulation in the Russian Federation	341
2.2.3 Regulation in China	342
2.2.4 Regulation in Europe	343
2.2.5 Regulation in India	345
3 Future Use of NPS Through the Prism of International Environmental Law	345
3.1 Applicability of Principles of International Environmental Law to Outer Space	345
3.2 Interaction Between Regulation of NPS and International Environmental Law	347
3.2.1 Obligation Not to Cause Transboundary Harm	347
3.2.2 Principle of Preventive Action	349
3.2.3 Principle of Cooperation	350
3.2.4 Precautionary Principle	350
3.2.5 Polluter Pays	351

3.3	Lack of Development	352
4	Future Developments	353
4.1	Use of Nuclear Reactors in Earth Orbit and Nuclear Thermal Propulsion (“NTP”)	353
4.2	RPS Technology in Deep-Space Missions and on Surface Rovers	355
4.3	Use of Reactors on Surface Missions	356
5	Conclusions and Recommendations	358
5.1	Conclusions	358
5.2	Recommendations	359
17	NewSpace and National Space Legislation	361
	<i>Ingo Baumann and Erik Pellander</i>	
1	Introduction	361
2	Impact of NewSpace on National Legislators	362
3	Countries Which Have Developed National Space Legislation in Response to Newspace	363
3.1	Finland	363
3.2	Luxembourg	364
3.3	Portugal	365
3.4	New Zealand	367
3.5	United Arab Emirates	368
4	Countries Which are Currently Developing National Space Legislation in Response to Newspace	369
4.1	Germany	370
4.2	India	371
5	Countries Adapting National Space Legislation in Response to NewSpace	373
5.1	Australia	373
5.2	United Kingdom	374
5.3	United States	377
5.3.1	FAA	377
5.3.2	FCC	379
5.3.3	NOAA	381
5.3.4	Other (New)Space Activities	382
6	Selected Elements of National Space Law in the Light of NewSpace	384
6.1	Material Scope	384
6.2	Personal and Territorial Scope	385
6.3	Scope of a Single Licence	386
6.4	Duration of the Licencing Procedure	386

TABLE OF CONTENTS

6.5	Licencing Fees	387
6.6	Technical, Professional and Financial Capacity	388
6.7	Liability and Insurance	388
6.8	Space Debris Mitigation	389
7	Summary and Conclusions	390
18 State Responsibility Facing the Growing Diversity of Space Projects and Actors – The Case of Satellite Deployment from an International Space Station		393
<i>Setsuko Aoki</i>		
1	Introduction: The Age of Growing Diversity of Space Projects and Actors	393
2	Legal Issues Concerning the Deployment of Satellites from the International Space Station	394
2.1	Background	394
2.2	Legal Issues	396
3	State Practice in Case of Satellite Deployment from the ISS/Kibo	398
3.1	Methodology of Analysis	398
3.2	National Space Legislation	399
3.2.1	USA and Japan	399
3.2.2	Definition of ‘Launch’ in Other National Space Legislation	401
3.3	Practice of Japan and the US	402
3.3.1	Mission Description	402
3.3.2	Registration Data of Japan and the US	404
3.3.3	Registration Manual of Japan	405
3.3.4	No Criterion on the Place of ‘Launch’	406
3.4	State Practice of Relevant States	407
3.5	Russian Practice	409
4	Conclusion	410
Part III George Robinson the Inspirer		
19 About George S. Robinson (1937-2018)		415
<i>Stephen E. Doyle</i>		

20 Cybernetics – Space Law and Cyberlaw as Tools for Mediating Interspecies Communication with Technological Transhumans and Posthumans	423
<i>George S. Robinson and P.J. Blount</i>	
1 Introduction	423
2 Life and Cybernetics	425
2.1 Cybernetics	425
2.2 Interface	428
2.3 Cybernetic Development	430
3 Transhumanism and Posthumanism	431
3.1 Governance	433
3.2 Cyberspace Governance and Law	433
3.3 Space Law and Metalaw	437
4 Conclusion	445
About the Authors and Editors	447
